Title: Environmental GIS Analyst

Company: Consor

Location: Toronto, Ontario, Canada

Posted: 6 days ago

Seniority level: Not Applicable

Employment type: Part-time

Industries: Civil Engineering

URL: https://ca.linkedin.com/jobs/view/4474449755

What Your Day Will Look Like:

Consor Canada is looking for a skilled and motivated Environmental GIS Analyst to support our growing and diverse environmental and engineering consulting business in Canada. You'll collaborate with a highly skilled and supportive team on meaningful environmental and engineering projects across a variety of industry sectors, including municipal infrastructure, aggregate and metal mining, energy, and land development. As part of this, your skills and expertise will contribute to environmental planning and design solutions through GIS analysis, spatial modelling, mapping, and technical reporting. You'll enjoy the flexibility of hybrid and remote work options, ongoing opportunities to build your technical expertise, and support from an experienced team committed to your growth and success.

Projected Compensation: $75,000 - $115,000/year CAD

What You'll Do:

- Provide GIS and geospatial support across a broad range of environmental and engineering projects:

- Baseline characterization studies and effects assessments to support environmental assessments and other development planning initiatives

- Natural heritage studies including wildlife and vegetation surveys, terrestrial and aquatic habitat mapping, and ecological land classification

- Archaeology desktop studies, assessments and excavations

- Hydrological and hydrogeological studies

- Stormwater management planning

- Flood and erosion hazard management and mitigation

- Environmental permitting and regulatory approval activities

- Develop high-quality mapping products, web maps, dashboards, story maps, and spatial analyses to support project planning, design, permitting, and stakeholder engagement.

- Create, maintain, and manage GIS databases, geodatabases, data collection systems, and spatial data standards.

- Conduct environmental and engineering analyses using geospatial datasets including LiDAR, orthophotography, satellite imagery, drone imagery, terrain models, watershed datasets, natural heritage information, archaeological datasets, and municipal infrastructure data.

- Contribute to technical reports, proposals, presentations and other key client deliverables.

- Develop positive working relationships and collaborate in a highly dynamic and supportive team environment.

- Provide creative and innovative solutions for projects by staying current on relevant regulatory drivers, emerging technologies, and market demands.

What You'll Need:

- 5+ years of consulting or industry-related experience, with demonstrated strengths in communication, problem-solving, project delivery, and collaboration.

- Diploma or Degree in GIS, Geography, Engineering Technology or related discipline.

- Strong proficiency with ESRI platform, including ArcGIS Pro, ArcGIS Online, and mobile applications.

- Familiarity with key public data sources in Ontario and mapping tools for a range of environmental consulting projects including ecology, hydrogeology, hydrology and/or archaeology.

- Working knowledge of coordinate systems, projections, spatial databases, metadata standards, and GIS data management best practices.

- Experience developing field data collection workflows and managing spatial data collected in the field.

- Proficiency with processing and interpreting LiDAR, UAV/drone, orthophotography, satellite imagery, and other remote sensing datasets.

- Experience with Python, ModelBuilder, Arcade, SQL, or other GIS automation tools is considered a strong asset.

- Working knowledge of municipal standards, engineering and environmental legislation, policies and regulatory approval processes.

What Benefits You’ll Enjoy:

We invest in us. Because our team members go above, below, and beyond the surface to care for our communities (inside and out), we do our best to take care of you by providing a comprehensive benefits package! Eligibility for some of the benefits outlined below is based on full-time work status; part-time are eligible based on hours worked. If you have questions, contact careers@consoreng.com .

- Career Growth & Development – Tuition reimbursement program, paid professional training, major license achievement bonus, extensive on-demand learning center, and paid professional memberships.

- Work-Life Alignment – Industry-competitive vacation time, ten designated holidays, flexible work schedules, paid parental leave in accordance with the Employment Standards Act (ESA), and eligibility for hybrid and remote work options for some employees based on role responsibilities.

- Wellness – Medical, dental and vision insurance, employee assistance program, and a fitness and wellness reimbursement.

- Life – Employer-paid term life insurance, employer-paid STD, critical illness and long-term disability insurance options, and Registered Retirement Savings Plan (RRSP) with company match.

- Community – Quarterly social events, paid group volunteering events, and employee networks and groups.

How Your Career Will Grow:

We know career growth is not always linear or streamlined—it’s often dynamic. You may want to explore a management track, try a new technical track, or move laterally to reposition your skills and talents. No matter what level you join us at or how you want to shape your career, we want Consor to be a place where you can learn and grow.

Why You’ll Love Consor:

At Consor, you’ll work with a network of engineers and scientists specializing in water, transportation, and environmental services delivering projects across multiple sectors and clients. Across geographies, you’ll have access to the resources and expertise found in a large consulting firm, while experiencing a community feel at the local level. You’ll experience a culture where we share in our successes and support one another through challenges. Here, there are countless opportunities to explore your career path by working on projects that help you expand your potential and take your career to new heights! Join our diverse team of experts who live and work alongside client partners, providing thoughtful solutions to create inspiring communities together.

Consor’s Commitment to Equal Opportunity in the Workplace

Consor fosters a workplace where teammates and job candidates are treated with dignity, and where different perspectives and life experiences are recognized as strengths. We are committed to fair employment practices that create access to meaningful opportunities for all, while upholding all applicable local, provincial, and federal laws. As an equal opportunity employer, Consor actively maintains an affirmative action program across our offices and worksites to support broader participation and representation.

In addition, your accessibility is important to us. Please let us know if you’d like accommodations to help us remove barriers so that you can participate throughout the hiring process. If you need more information or special assistance for persons with disabilities or limited English proficiency, contact Human Resources at 1-289-328-0745. Persons with hearing and speech impairments can contact Consor by using the Message Relay Service, a toll-free telecommunication device for the deaf (TDD). Call 711 for TTY/TDD.

If any applicant believes they have been discriminated against or desires further information or assistance, contact us at 1-289-328-0745.

Notices: The above job description is intended to relay a general sense of the position's responsibilities and expectations. It does not describe all tasks that may be assigned. As business demands change, the essential functions of this position may also change. The position requires the successful completion of applicable pre-employment substance screening and background checks.

At Consor, we're committed to recruiting teammates ready to expand their potential. To safeguard candidates, we use only legitimate recruitment practices. Initial outreach is conducted through official Consor email addresses or LinkedIn messaging; be suspicious of any inconsistencies. We do not request personal data, sensitive information or banking details during the application process. Interviews are conducted via phone, in person, or through Microsoft Teams—never through messaging apps or other calling services. All job offers are merit-based, delivered verbally, and followed up by written confirmation. If personal information is required to initiate the hiring process, it will be collected through secure, authorized channels. If ever in doubt, contact careers@consoreng.com .
