Hiring Manager
Low Carbon Fleet Programs, Coast Mountain Bus Company

Re: Senior Advisor, Zero Emissions

Dear Hiring Manager,

I would like to be considered for the Senior Advisor, Zero Emissions position. I am an Assistant Planner in Transportation Planning at the City of Toronto, and in 2023 I worked at Metrolinx as a Transportation Planner in Service Design, simulating GO rail services.

The posting asks for analytical frameworks, dashboards and models that support decisions on how a transit fleet is operated. That is the kind of work I have done. At Metrolinx I ran OpenTrack simulations of GO services to establish what proposed changes would do to run times and reliability before anyone committed to them. I also set up a command line workflow that pre-simulated slow orders in batches, cutting turnaround on scenario requests from days to hours, and built the Crew Variance Tool, a Python application that read large JSON operations files and summarised speed profiles and run-time variance across subdivisions. At the City I built the Transportation Data Dashboard, which brings several years of travel survey data into one validated source, and I write the technical reports and briefing notes that carry findings to senior staff.

I should be straightforward about the gaps. I have no experience with zero-emission buses, charging infrastructure, energy modelling or greenhouse gas reporting, and I have not worked with Fabric, Power BI or machine learning. The posting asks for seven years of analysis experience and I have closer to four. It also includes managing staff and overseeing consultants, and I have done neither. I would be coming to the subject as a learner, with the data and simulation skills to build on.

Thank you for considering my application.

Sincerely,

Abdullah Al Zahid
