Re: Project Manager (Transportation Major Projects)

Dear Hiring Manager,

I would like to apply for the Project Manager position in the Transportation Major Projects division. I am an Assistant Planner in Transportation Planning at the City of Toronto, and before that I worked in GO rail service design at Metrolinx and briefly at Mott MacDonald.

The division works on the owner's side of major projects, and that is the side I work on now. At the City I review the studies consultants and applicants submit against City standards and recommend conditions where something is missing. I run assigned projects from scoping through to recommendations, holding the schedule and quality myself, and I present to planners, engineers and managers in other divisions.

At Mott MacDonald I ran Synchro traffic simulations of Ontario Line construction staging and road closures, and at Metrolinx I ran OpenTrack simulations of GO rail services. I also set up a command line workflow that pre-simulated slow orders in batches, cutting turnaround on scenario requests from days to hours, and built the Crew Variance Tool, a Python application that read large JSON operations files and summarised speed profiles and run-time variance across subdivisions.

I should be straightforward about the gaps. I have not managed major infrastructure projects through procurement and delivery, directed staff and subconsultants, or done business development and proposals, and I am not registered as a P.Eng. The posting asks for a Class 5 licence and a personal vehicle, which I do not have. I am based in Toronto.

Thank you for considering my application.

Sincerely,

Abdullah Al Zahid
