Re: Senior Transportation Planner/Engineer

Dear Hiring Manager,

I would like to apply for the Senior Transportation Planner/Engineer position with the Integrated Mobility discipline in the GTHA. I am an Assistant Planner in Transportation Planning at the City of Toronto, and before that I worked in GO rail service design at Metrolinx and briefly at Mott MacDonald.

At the City I review development applications and the transportation studies filed with them against City standards and Official Plan policy, run assigned studies from scoping through to recommendations, and present to planners, engineers and managers in other divisions. I coordinate with divisions, consultants, applicants and outside agencies whose priorities conflict. That is the client side of the GTHA market the posting describes.

At Mott MacDonald I ran Synchro traffic simulations of Ontario Line construction staging and road closures, and at Metrolinx I ran OpenTrack simulations of GO rail services. I also set up a command line workflow that pre-simulated slow orders in batches, cutting turnaround on scenario requests from days to hours, and built the Crew Variance Tool, a Python application that read large JSON operations files and summarised speed profiles and run-time variance across subdivisions.

I should be straightforward about the gaps, which are large for this level. The posting asks for ten years of progressive experience, six of them in project management; I have about four and a half. I have not led Municipal Class Environmental Assessments or functional design studies, managed people, budgets or consultation programs, or led business development and proposals. If the team is also hiring at the planner or engineer level, I would welcome being considered for that role.

Thank you for considering my application.

Sincerely,

Abdullah Al Zahid
