Re: Transportation Planner/Engineer

Dear Hiring Manager,

I would like to apply for the Transportation Planner/Engineer position with the Integrated Mobility team in Toronto. I am an Assistant Planner in Transportation Planning at the City of Toronto, and before that I worked in GO rail service design at Metrolinx and briefly at Mott MacDonald. I hold a master's degree in Transportation Engineering.

The posting lists traffic impact assessments, traffic operations studies and transit planning among the team's work. At the City I review development applications and the transportation studies filed with them against City standards and Official Plan policy, so I know what a municipal reviewer looks for in a traffic impact assessment. I analyze travel and network data, including several years of the Transportation Tomorrow Survey, and I built the Transportation Data Dashboard, which combined several years of survey data into one validated source the division reports from.

The posting lists Python as an asset, along with GIS and traffic modelling software. I work in Python, SQL, ArcGIS Pro and QGIS, and I have used Synchro to simulate Ontario Line construction staging at Mott MacDonald and OpenTrack for GO rail services at Metrolinx. I also set up a command line workflow that pre-simulated slow orders in batches, cutting turnaround on scenario requests from days to hours, and built the Crew Variance Tool, a Python application that read large JSON operations files and summarised speed profiles and run-time variance across subdivisions.

I should be straightforward about the gaps. My consulting experience is limited to a short placement at Mott MacDonald in early 2023, and I have not written proposals. I have not prepared transit ridership forecasts, on-demand transit studies or signal designs, or used SimTraffic, and I am not registered with PEO.

Thank you for considering my application.

Sincerely,

Abdullah Al Zahid
