Re: Senior Project Manager - Transportation/Traffic Engineering & Roadway Safety (Toronto)

Dear Hiring Team,

I would like to be considered for the Senior Project Manager position in Traffic Engineering and Roadway Safety. I am an Assistant Planner in Transportation Planning at the City of Toronto, with a master's degree in transportation engineering from the University of Alberta, and I am interested in consulting work on traffic, corridor and transportation master plan studies.

At the City I review development applications and the transportation studies filed with them, analyze Transportation Tomorrow Survey data, and write the briefing notes that carry findings and options to senior staff. I also advise on right-of-way questions, and I built the city-wide right-of-way width dataset. At Mott MacDonald I simulated Ontario Line construction staging and road closures in Synchro, and I have also worked in VISSIM, MATSim and OpenTrack. I use GIS, AutoCAD, Python and SQL day to day.

At Metrolinx I set up a command line workflow that pre-simulated slow orders in batches, cutting turnaround on scenario requests from days to hours, and built the Crew Variance Tool, a Python application that read large JSON operations files and summarised speed profiles and run-time variance across subdivisions.

I should be straightforward about the gaps. The posting asks for ten years of experience, a P.Eng. or eligibility for registration, and business development and leadership capability. I have about four and a half years of relevant experience and am not registered with Professional Engineers Ontario, as an EIT or otherwise. I have reviewed traffic impact studies rather than written them for clients, and I have not led road safety audits, parking studies or Vision Zero programs, written proposals, managed project budgets, supervised staff, or worked in business development. I am applying because traffic analysis, modelling and transportation planning is where my experience sits, and I would like to grow toward a lead role.

Thank you for considering my application.

Sincerely,

Abdullah Al Zahid
