Re: Traffic Analysis Engineer (Calgary and Vancouver postings)

Dear Hiring Manager,

I would like to be considered for the Traffic Analysis Engineer position. I am a transportation engineer with a master's degree and nearly four years of professional experience, and I am an Assistant Planner in Transportation Planning at the City of Toronto. The posting describes work I see from the reviewing side every day: site plans, land development and corridor studies, and the traffic analysis that supports them.

At the City I review the transportation studies filed with development applications against City standards, check whether their assumptions and results hold up, and write up what is missing. I analyze travel data, including several years of the Transportation Tomorrow Survey, and I write the briefing notes and reports that carry the findings to senior staff. At Mott MacDonald I modelled road closures and construction staging for the Ontario Line in Synchro, and my graduate work used MATSim and traffic flow modelling for evacuation. I use AutoCAD and Civil 3D, and I work in Python and SQL.

At Metrolinx I set up a command line workflow that pre-simulated slow orders in batches, cutting turnaround on scenario requests from days to hours, and built the Crew Variance Tool, a Python application that read large JSON operations files and summarised speed profiles and run-time variance across subdivisions.

I should be straightforward about the gaps. I have not written traffic impact studies as a consultant, so I know what a good one contains from reviewing them rather than from producing them. I have not used Vistro, Sidra or Aimsun, and I do not know the Alberta Transportation, BC MoTT or TAC guidelines well. I have not run field data collection, and I have not written proposals. I am not registered as a P.Eng. or EIT. I am applying because the analysis and reporting are close to my own work, and I would like to move into project delivery in a consulting team.

Thank you for considering my application.

Sincerely,

Abdullah Al Zahid
