SUMMARY

Transportation engineer with a master's degree, currently an Assistant Planner in Transportation Planning with the City of Toronto. Runs assigned projects from scoping to recommendations, coordinates with divisions, agencies and consultants, maintains the road and right-of-way datasets the division depends on, and writes the briefing notes and reports that carry issues to senior staff.

EXPERIENCE

Assistant Planner, Transportation Planning

City of Toronto | January 2024 – present

- Run assigned projects from scoping through to recommendations, planning the work, holding the schedule and quality myself, and reporting progress to the people relying on it.
- Coordinate with divisions, consultants, applicants and outside agencies whose priorities conflict, and work issues through to a position everyone can act on.
- Build and maintain the road and right-of-way datasets the division depends on, using GIS and Python, including a ROW-width dataset covering all city roads, built with QGIS, MapBox and JavaScript.
- Advise applicants and staff on transportation planning, by-laws and related regulations, and with policy staff recommend and report to Council on new transportation regulations and guidelines.

Transportation Planner, Simulation and Modelling

Metrolinx, Service Design | February 2023 – January 2024

- Ran OpenTrack simulations of GO rail services to establish what proposed operating and infrastructure changes would do to run times, reliability and recovery before they were taken forward.
- Assessed the service effect of temporary and permanent slow orders, the kind of restriction that construction on an operating railway imposes.
- Built the Crew Variance Tool, a Python application that read large JSON operations files and produced summaries of speed profiles and run-time variance across subdivisions.
- Set up a command line workflow so temporary and permanent slow orders could be pre-simulated in batches, cutting turnaround on scenario requests from days to hours.

Graduate Transportation Planner

Mott MacDonald | January – February 2023

- Short consulting placement on Ontario Line work. Ran traffic simulations to estimate how construction staging would affect surrounding streets, and prepared the supporting material for the project team.

Graduate Research Assistant

University of Alberta | January 2020 – August 2022

- Master's research on how road networks perform during emergency evacuations, using macroscopic (LWR) and agent-based (MATSim) models.
- Worked with large travel datasets and wrote up results for readers without a modelling background.

SKILLS

Project planning, scheduling and follow-through. Coordination across City divisions, agencies and consultants. Briefing notes, reports and presentations for senior staff. Synchro and VISSIM. AutoCAD and Civil 3D; ArcGIS Pro, QGIS and MapBox. Python and SQL. MS Office.

EDUCATION

MSc, Transportation Engineering — University of Alberta, 2022

BSc, Civil Engineering — Bangladesh University of Engineering and Technology, 2018

BSc, Computer Science — University of British Columbia, in progress (2025–2027)
