Sarah Persadsingh
Human Resources
Toronto Water, City of Toronto

Re: Engineer, Process Innovation & Energy (Job ID 65654)

Dear Sarah Persadsingh,

I would like to apply for one of the two Engineer positions in Toronto Water's Process, Innovation & Energy unit. I should say at the outset that I come to it from transportation rather than water and wastewater process engineering, and I have tried to be clear below about both what I would bring and where I fall short.

The part of the role I would bring is data analysis and the development of recommendations from it, which the posting lists among its qualifications. At Metrolinx I set up a command line workflow that pre-simulated slow orders in batches, cutting turnaround on scenario requests from days to hours, and built the Crew Variance Tool, a Python application that read large JSON operations files and summarised speed profiles and run-time variance across subdivisions. At the City I built the Transportation Data Dashboard, which combined several years of survey data into one validated source the division reports from, and I analyze travel and network data to work out where capacity is short.

I write technical memoranda, briefing notes and presentations, run assigned studies from scoping through to recommendations, and coordinate with divisions, consultants and outside agencies. My master's research modelled how road networks perform during emergency evacuations.

The gaps are substantial. The posting requires registration as a P.Eng. with PEO and a valid Class G licence, and I hold neither. I have no experience in wastewater or stormwater treatment, drinking water, biosolids or energy management, treatment process assessment and optimization, or bench and pilot trials, and I have not worked under the Safe Drinking Water Act, the Ontario Water Resources Act or the Environmental Protection Act. I am applying because the data analysis side of the role is familiar, and because the Qualified List covers permanent and temporary positions.

Thank you for considering my application.

Sincerely,

Abdullah Al Zahid
