Heather Anne Thompson

Human Resources

Fleet Services, City of Toronto

Re: Project Manager, Fleet Safety Operations & Continuous Improvement (Job ID 67150)

Dear Heather Anne Thompson,

I would like to apply for the Project Manager, Fleet Safety Operations and Continuous Improvement position with Fleet Services. I am an Assistant Planner with the City, and the parts of this role that match my experience are the data analysis, the performance measures and the continuous improvement.

Qualification eight asks for experience analyzing large volumes of safety or operational data, developing key performance indicators and preparing data-driven recommendations. At Metrolinx I set up a command line workflow that pre-simulated slow orders in batches, cutting turnaround on scenario requests from days to hours, and built the Crew Variance Tool, a Python application that read large JSON operations files and summarised speed profiles and run-time variance across subdivisions. At the City I built the Transportation Data Dashboard, which combines several years of data from separate sources into one validated source and tracks divisional performance continuously rather than in a report rebuilt by hand.

On continuous improvement and communication, I identify where a process is not working, coordinate the people needed to change it and see the change through to adoption, and I write the reports, briefing materials and presentations that carry recommendations to senior management. As a City employee I work within the City's structure and decision-making processes every day.

I should be straightforward about the gaps, because several are central to the role. I have not worked in fleet safety or collision management, administered CVOR compliance, or used fleet telematics, and I have not directed professional, technical or administrative staff. My knowledge of the Highway Traffic Act, the Occupational Health and Safety Act and the CVOR program is general rather than practical. I do not currently hold a Class G licence. I am applying because the analytical and improvement side of the role is work I do now, and because the Qualified List covers permanent and temporary positions.

Thank you for considering my application.

Sincerely,

Abdullah Al Zahid
