SUMMARY

Transportation engineer with a master's degree, currently an Assistant Planner with the City of Toronto, where reviewing development applications against City standards and Official Plan policy is a core part of the job. Coordinates across divisions, agencies and applicants whose priorities conflict, and writes the briefing notes that carry issues and options to senior staff.

EXPERIENCE

Assistant Planner, Transportation Planning

City of Toronto | January 2024 – present

- Review development applications and the studies filed with them against City standards and Official Plan policy, and recommend conditions where something is missing.
- Coordinate with divisions, consultants, applicants and outside agencies whose priorities conflict, and work issues through to a position everyone can act on.
- Run assigned projects from scoping through to recommendations, planning the work, holding the schedule and quality myself, and reporting progress to the people relying on it.
- Write the briefing notes, memos and presentations that carry issues, options and recommendations to senior staff across divisions.
- Research policy questions as they come up, looking at how City policy, provincial legislation and work by other levels of government bear on them.

Transportation Planner, Simulation and Modelling

Metrolinx, Service Design | February 2023 – January 2024

- Ran OpenTrack simulations of GO rail services to establish what proposed operating and infrastructure changes would do to run times, reliability and recovery before they were taken forward.
- Set up a command line workflow so temporary and permanent slow orders could be pre-simulated in batches, cutting turnaround on scenario requests from days to hours.
- Built the Crew Variance Tool, a Python application that read large JSON operations files and produced summaries of speed profiles and run-time variance across subdivisions.
- Worked with schedulers, operations staff and engineers to settle the variables a service plan had to be built on.

Graduate Transportation Planner

Mott MacDonald | January – February 2023

- Short consulting placement on Ontario Line work. Ran traffic simulations to estimate how construction staging would affect surrounding streets, and prepared the supporting material for the project team.

Graduate Research Assistant

University of Alberta | January 2020 – August 2022

- Master's research on how road networks perform during emergency evacuations, using macroscopic (LWR) and agent-based (MATSim) models.
- Worked with large travel datasets and wrote up results for readers without a modelling background.

SKILLS

Development application review against City standards and Official Plan policy. Project planning, scheduling and follow-through. Coordination across divisions, agencies and applicants. Briefing notes, memos and presentations for senior staff. Policy research. Python (Pandas, NumPy), SQL, ArcGIS and QGIS. MS Office.

EDUCATION

MSc, Transportation Engineering — University of Alberta, 2022

BSc, Civil Engineering — Bangladesh University of Engineering and Technology, 2018

BSc, Computer Science — University of British Columbia, in progress (2025–2027)
