Lina Truong

Human Resources

Toronto Water, City of Toronto

Re: Project Manager TW, Capital Planning & Implementation (Job ID 66777)

Dear Lina Truong,

I would like to apply for one of the Project Manager TW positions with Toronto Water's Capital Planning and Implementation section. I am a civil engineer and an Assistant Planner with the City, and I would welcome the chance to move closer to the delivery of municipal infrastructure.

The posting asks for someone to lead the review of drawings, purchasing documents and specifications prepared by staff, contractors and consultants. At the City I review engineering submissions, consultant studies and drawings against City standards and recommend conditions where something is missing, and I run assigned projects from scoping through to recommendations while holding the schedule and quality myself. I also analyze network data to work out where capacity is short and what that means for maintenance and capital spending.

The posting places weight on communicating technical information to non-technical audiences and on working in an operational environment. Much of my job is explaining technical findings to managers in other divisions through briefing notes and memos. At Metrolinx I worked on an operating railway, assessing what construction-related speed restrictions would do to service. At Metrolinx I set up a command line workflow that pre-simulated slow orders in batches, cutting turnaround on scenario requests from days to hours, and built the Crew Variance Tool, a Python application that read large JSON operations files and summarised speed profiles and run-time variance across subdivisions.

I should be straightforward about the gaps. I do not currently hold a Class G licence, which the posting lists as a requirement, so I would need to resolve that. I have not managed municipal infrastructure design and construction, administered contracts and payments, or directed staff, and my knowledge of the Occupational Health and Safety Act is general. I do not hold a PMP or P.Eng. I am applying because the review and project coordination parts of the role are familiar, and because the Qualified List covers permanent and temporary positions.

Thank you for considering my application.

Sincerely,

Abdullah Al Zahid
