Sheena Ramcharan

Human Resources

Toronto Water, City of Toronto

Re: Senior Project Manager TW, Water Treatment and Supply (Job ID 64397)

Dear Sheena Ramcharan,

I would like to apply for the Senior Project Manager TW position with the Water Treatment and Supply section of Toronto Water. I should say at the outset that I come to it from transportation rather than water treatment, and I have tried to be clear below about both what I would bring and where I fall short.

I am a civil engineer and an Assistant Planner with the City. I review engineering submissions, consultant studies and drawings against City standards, and I run assigned projects from scoping through to recommendations. The posting also asks for someone who analyzes data from operating systems to identify opportunities for improvement. At Metrolinx I set up a command line workflow that pre-simulated slow orders in batches, cutting turnaround on scenario requests from days to hours, and built the Crew Variance Tool, a Python application that read large JSON operations files and summarised speed profiles and run-time variance across subdivisions. At the City I built the Transportation Data Dashboard, which brought several years of operational data into one validated source the division reports from.

The gaps are substantial. I have no experience in municipal water treatment, its unit processes, residuals management, pumping or storage, and I have not worked under the Safe Drinking Water Act or the Ontario Water Resources Act. I have not supervised engineers or technical staff, prepared capital and operating budgets, or prepared RFPs and tender documents. I am applying because the Qualified List covers permanent and temporary positions, and if a more junior engineering role in Water Treatment and Supply would suit my background better, I would welcome being considered for it.

Thank you for considering my application.

Sincerely,

Abdullah Al Zahid
