Airports

Dillon Consulting Limited, Oakville, ON

Re: Airport Design Engineer

Dear Hiring Manager,

I would like to apply for the Airport Design Engineer position, based in Oakville or another Dillon office. I am a civil engineer and an Assistant Planner with the City of Toronto, and I want to be clear from the start that I come to this from transportation planning and analysis rather than airside design.

Some of the project management side of the role is familiar. The posting describes tracking open items with consultants and coordinating scope, schedule and technical inputs across teams. At the City I review engineering submissions, consultant drawings and studies against City standards, recommend conditions where something is missing, and run assigned projects from scoping through to recommendations while holding the schedule myself. I coordinate with divisions, consultants and outside agencies whose priorities conflict, and I write the reports and briefing notes that carry decisions upward.

The posting also says Dillon wants its teams to automate the routine so they can focus on problem-solving. That is how I work. At Metrolinx I set up a command line workflow that pre-simulated slow orders in batches, cutting turnaround on scenario requests from days to hours, and built the Crew Variance Tool, a Python application that read large JSON operations files and summarised speed profiles and run-time variance across subdivisions.

The gaps are significant. I am not a licensed Professional Engineer and have not registered with PEO. I do not have five years in airport engineering, civil design or site development; I have not done airside design or airfield pavement work, applied ICAO or FAA standards, or used MicroStation, AviPLAN, SkySafe or AutoTURN, though I have worked in AutoCAD and Civil 3D; and I have not managed budgets or taken infrastructure through construction. If Dillon's airport team has a junior or intermediate role where I could build that experience, I would welcome being considered for it.

Thank you for considering my application.

Sincerely,

Abdullah Al Zahid
