Talent Acquisition

Airport Planning and Design

Stantec Consulting Ltd., Markham, ON

Re: Aviation Planner - Airports

Dear Hiring Manager,

I would like to apply for the Aviation Planner position with the Airport Planning and Design team. I come to it from transportation planning, and airport planning is a field I would like to grow into.

The posting covers ground transportation facilities and commercial land development at airports as well as airside and terminal work, and the landside is where my experience applies. At the City of Toronto I analyze travel and network data to establish where capacity falls short, review development applications and the transportation studies filed with them, and write the reports and presentations that carry findings to managers and outside agencies. The operational side of facility planning, testing whether a design will cope with the demand placed on it, is what I have done with simulation: traffic simulation of Ontario Line construction staging at Mott MacDonald, OpenTrack simulation of GO rail services at Metrolinx, and agent-based MATSim models in my master's research.

At Metrolinx I set up a command line workflow that pre-simulated slow orders in batches, cutting turnaround on scenario requests from days to hours, and built the Crew Variance Tool, a Python application that read large JSON operations files and summarised speed profiles and run-time variance across subdivisions. I am comfortable learning new software quickly, which I expect would matter here.

I should be straightforward about the gaps. I have no airport planning experience and have not prepared development or concept plans for airfields or terminals. I have worked in AutoCAD, Civil 3D and Adobe Photoshop and Illustrator, but not in Aviplan or Bluebeam Revu, and I would be learning the applicable aviation standards and regulations. What I would bring from the start is the transportation analysis, the simulation background and the report writing.

Thank you for considering my application.

Sincerely,

Abdullah Al Zahid
