Aviation, Transportation

Stantec Consulting Ltd., Calgary, AB

Re: Aviation Project Manager (Req ID 1006666)

Dear Hiring Manager,

I would like to apply for the Aviation Project Manager position with the Aviation team, based in Calgary or Vancouver. I am a civil engineer and an Assistant Planner with the City of Toronto, and I should be clear at the outset that I come from transportation planning rather than airport engineering, and that I am currently based in Toronto.

Some parts of the role connect to my current work. I review engineering submissions, consultant drawings and studies against City standards and jurisdictional requirements, and recommend conditions where something is missing. I run assigned projects from scoping through to recommendations while holding the schedule myself, and I build working relationships with applicants, consultants and outside agencies whose priorities conflict. On construction, I simulated how Ontario Line construction staging would affect surrounding streets at Mott MacDonald, and at Metrolinx I assessed what construction-related speed restrictions would do to GO rail service.

I also try to improve how technical work gets done, not only do it. At Metrolinx I set up a command line workflow that pre-simulated slow orders in batches, cutting turnaround on scenario requests from days to hours, and built the Crew Variance Tool, a Python application that read large JSON operations files and summarised speed profiles and run-time variance across subdivisions. Setting up a method once and then spending the time on what the results mean is how I would approach project delivery as well.

The gaps are substantial, and I would rather state them plainly. I do not hold a P.Eng. licence in any province. The posting asks for seven or more years in airport civil infrastructure and five or more managing airport projects, and I have neither; I have not acted as engineer of record, managed project budgets, carried out construction observation or led business development. If the Aviation team has a junior role where my analytical background would be useful, I would welcome being considered for it.

Thank you for considering my application.

Sincerely,

Abdullah Al Zahid
