Aviation

WSP Canada, Ontario

Re: Civil Project Engineer - Aviation (Job ID 85226)

Dear Hiring Manager,

I would like to apply for the Civil Project Engineer position with the Aviation team in Ontario. I am a civil engineer and an Assistant Planner with the City of Toronto, and I come to airport work from transportation planning, so I want to be clear about both what I would bring and where I fall short.

Several of the listed responsibilities connect to my current work. I review engineering submissions, specifications, consultant drawings and studies against City standards, and recommend conditions where something is missing. I prepare technical reports and presentation materials, liaise with consultants, applicants and agencies to resolve issues, and run assigned projects to schedule. The posting lists experience with modelling tools as an advantage: I have worked with VISSIM, Synchro, MATSim and OpenTrack.

At Metrolinx I set up a command line workflow that pre-simulated slow orders in batches, cutting turnaround on scenario requests from days to hours, and built the Crew Variance Tool, a Python application that read large JSON operations files and summarised speed profiles and run-time variance across subdivisions. At the City I built the Transportation Data Dashboard, bringing several years of data into one validated source the division reports from.

The gaps are real. I am not a licensed Professional Engineer and have not registered with PEO. I have closer to four years of engineering experience in Canada than five, none of it in aviation. I have not designed airport infrastructure, worked to TP312, ICAO or FAA standards, prepared quantity take-offs or cost estimates, or carried out construction field reviews; I have worked in AutoCAD and Civil 3D, but not on airport design. I am applying because the review and coordination side of the role is familiar, and I would welcome being considered at a more junior level if that would suit the team better.

Thank you for considering my application.

Sincerely,

Abdullah Al Zahid
