Talent Acquisition

Transportation Planning & Traffic Engineering
Stantec Consulting Ltd., Markham, ON

Re: Project Manager - Transportation Engineering & Planning (Req ID 1007868)

Dear Hiring Manager,

I would like to apply for the Project Manager, Transportation Engineering and Planning position with the Transportation Planning and Traffic Engineering team in Markham or Toronto. My work so far has been on the public side of transportation planning, and consulting is where I would like to take it.

The posting lists traffic impact studies, construction staging plans, and surface transit lines and stations among the team's work. At the City of Toronto I review development applications and the transportation studies filed with them against City standards, so I know what a municipal reviewer looks for in a traffic impact study and where submissions tend to fall short. At Mott MacDonald I ran traffic simulations to estimate how Ontario Line construction staging would affect the surrounding streets, and at Metrolinx I ran OpenTrack simulations of GO rail services and assessed what temporary and permanent speed restrictions would do to service.

Of the software the posting names, I have worked with Synchro, VISSIM, ArcGIS and Python, as well as MATSim and OpenTrack. At Metrolinx I set up a command line workflow that pre-simulated slow orders in batches, cutting turnaround on scenario requests from days to hours, and built the Crew Variance Tool, a Python application that read large JSON operations files and summarised speed profiles and run-time variance across subdivisions. I write the technical reports, memos and presentations that carry findings to decision-makers, and I coordinate with agencies, consultants and applicants whose priorities often conflict.

I should be straightforward about the gaps. The posting asks for eight or more years of transportation experience, including five or more in project management, business development and proposal preparation. I have closer to four years, and I have not managed consulting projects, prepared proposals, or handled project budgets and invoicing. I have not used Aimsun, EMME, TransCAD, VISUM or HCS, and I do not hold a P.Eng. If the team is also hiring at the transportation planner or engineer level, I would welcome being considered for that role.

Thank you for considering my application.

Sincerely,

Abdullah Al Zahid
