Re: Supervisor, Traffic Planning (Req ID 28597)

Dear Hiring Manager,

I would like to apply for the Supervisor, Traffic Planning position in the Development Engineering & Construction section. I am an Assistant Planner in Transportation Planning at the City of Toronto, and reviewing development applications from a transportation perspective is the core of what I do.

At the City I review development applications and the transportation studies filed with them against City standards and Official Plan policy, and recommend conditions where something is missing. I advise applicants and staff on transportation planning, by-laws and related regulations, monitor the effect of zoning regulations, and with policy staff recommend and report to Council on new transportation regulations and guidelines. I run assigned studies from scoping through to recommendations and present to planners, engineers and managers in other divisions.

At Mott MacDonald I ran Synchro traffic simulations to estimate how Ontario Line construction staging and road closures would affect the surrounding streets, and at Metrolinx I ran OpenTrack simulations of GO rail services. I also set up a command line workflow that pre-simulated slow orders in batches, cutting turnaround on scenario requests from days to hours, and built the Crew Variance Tool, a Python application that read large JSON operations files and summarised speed profiles and run-time variance across subdivisions.

I should be straightforward about the gaps. The posting asks for eight years of related experience, including three in a leadership role. I have about four and a half years, and I have not supervised staff, set work plans for a team, or procured and managed consultants. I am not registered with Professional Engineers Ontario, which the posting lists as preferred, and I do not hold a Class G licence, so I would reach meetings and sites by other means. I am applying because the review work your team does is the work I do now.

Thank you for considering my application.

Sincerely,

Abdullah Al Zahid
