Context

Looking for 2 GIS Managers for Go Expansion Program

Missions/Main Duties

- Provide strategic leadership for the GIS function, aligning GIS capabilities with Metrolinx business, operational, infrastructure, and asset-management objectives.

- Develop and implement the enterprise GIS roadmap, governance framework, standards, and operating model.

- Lead the administration, architecture, security, and evolution of ArcGIS Enterprise and related GIS environments.

- Establish GIS data governance, quality standards, metadata, security, access, and data lifecycle management practices.

- Lead integration of GIS with enterprise systems, asset-management platforms, engineering systems, and other corporate data sources.

- Oversee development and implementation of enterprise GIS applications, dashboards, web maps, and field solutions.

- Identify opportunities to leverage GIS, automation, spatial analytics, and AI to improve business processes and decision-making.

- Manage GIS resources, priorities, work plans, budgets, deliverables, risks, and stakeholder relationships.

- Establish GIS project management and delivery processes using Jira, Microsoft Teams, SharePoint, and related collaboration tools.

- Define and monitor GIS KPIs, service performance, adoption, data quality, and business value.

- Lead change management, user adoption, training, documentation, and knowledge transfer.

- Provide technical leadership and mentoring to GIS Specialists and GIS Technicians.
