Infrastructure Ontario (IO), an Ontario crown corporation, provides a wide range of services to support the Ontario government's initiative to modernize and maximize the value of public infrastructure and realty. IO has been recognized domestically and internationally for the way it does business and the success it has had with its major projects, real estate services, infrastructure lending, commercial projects, and development mandate. IO delivers some of the most complex, ambitious commercial and land development solutions for the Province and continues to evolve and expand its capabilities to maximize its public impact and deliver on its vision of creating a connected, modern and competitive Ontario.

Position Purpose

The Senior Planning Advisor plays a key role in the successful initiation and planning of capital, repair, ministry, and corporate infrastructure projects. Working within Capital Investments, this position provides planning oversight, project coordination, intake management, reporting, and portfolio support to ensure projects are effectively scoped, prioritized, and positioned for successful delivery.

The role serves as a central point of coordination between project teams, ministry partners, consultants, and internal business groups, while contributing to strategic planning, project governance, reporting, and continuous improvement initiatives across the project lifecycle.

What You Will Do

- Coordinate project intake activities and oversee the collection, review, and tracking of project initiation requirements, including scope, schedule, budget, business cases, and supporting documentation.

- Support project and portfolio planning activities by maintaining planning tools, schedules, dashboards, and program documentation across multiple initiatives.

- Review and interpret project information to assist with project complexity assessments, risk evaluation, prioritization activities, and delivery planning.

- Prepare reports, briefing materials, project summaries, presentations, and portfolio updates for leadership, ministry partners, and other stakeholders.

- Monitor project planning activities and track progress against key milestones, deliverables, schedules, and performance indicators.

- Maintain planning databases, reporting systems, and document repositories to support effective project governance and decision-making.

- Generate portfolio insights through the analysis and interpretation of project and planning data to support business planning and reporting activities.

- Coordinate with consultants, service providers, ministry representatives, and cross-functional teams to support project readiness and successful execution.

- Contribute to the development and enhancement of planning processes, reporting tools, dashboards, and intake frameworks to improve operational efficiency and data quality.

- Provide guidance and training related to project management information systems, planning processes, governance requirements, and reporting standards.

- Collaborate with teams across project delivery, legal, procurement, partnerships, real estate, and other business areas to ensure alignment throughout the planning lifecycle.

- Support assigned projects and programs through various phases of delivery, including oversight of external advisors, monitoring project risks and issues, and supporting project close-out activities.

Who You Are

- Relevant post-secondary education in project management, infrastructure planning, urban planning, engineering, architecture, public administration, construction management, or a related discipline.

- Several years of experience supporting capital projects, infrastructure programs, project planning, project delivery, or portfolio management activities.

- Experience in public sector, infrastructure, construction, real estate, or project delivery environments.

- Knowledge of project scoping, scheduling, capital planning, cost estimation, risk assessment, and project governance practices.

- Experience using project reporting, dashboarding, and business intelligence tools such as Power BI, along with advanced proficiency in Microsoft Excel and PowerPoint.

- Strong analytical skills with the ability to interpret data, identify trends, and develop meaningful reports and recommendations.

- Experience coordinating multiple priorities and managing competing deadlines within a complex project environment.

- Excellent written and verbal communication skills, including experience preparing executive presentations, reports, briefing notes, and stakeholder communications.

- Demonstrated ability to build effective working relationships with internal and external stakeholders.

- Strong organizational skills and attention to detail with a focus on quality, accuracy, and continuous improvement.

- Experience with infrastructure planning methodologies, project complexity assessments, stage-gate frameworks, or risk management approaches is considered an asset.

- Professional certifications such as PMP, P.Eng., OAA, or other relevant credentials are considered an asset.

What We Offer

- Commitment to creating a diverse, equitable and inclusive culture that promotes a sense of belonging and represents and reflects the needs of the communities we serve.

- A defined contribution pension plan, where IO contributes the equivalent of 5% of a full-time employee’s annual salary, with an option for IO to match an additional 5% contribution made by the employee. IO also offers a Group Retirement Savings Plan and Group Tax Free Savings Account, designed to help IO colleagues plan and save for their future.

- A comprehensive package that covers health, dental, vision, out-of-country care, paramedical services, and more.

- A pregnancy and parental leave program that offers expecting, eligible employees a top-up to 95% of their annual base salary for 31 weeks, and our parental leave program offers eligible employees a top-up to 95% of their annual base salary for 15 weeks.

- Access to our $1000 Healthcare Spending Account to top up expenses not covered in the benefits program and a Lifestyle Account that expands the eligibility of health and wellness options and can include coverage for gym memberships and fitness equipment, nutrition counselling or financial planning.

- Support for professional development opportunities for all colleagues through a broad range of learning programs that include in-person and online training, leadership development, and support for colleagues' well-being.IO will also cover the costs associated with up to two membership and license fees per year for eligible colleagues if directly related to the employee's role.

- Access to a suite of virtual healthcare options to support non-urgent medical needs.

- A convenient, central location at 1 Dundas St West, easily accessible by public transit.

We offer a competitive salary range of $90,100 to $114,000 (P4 level), pay will align with skills, knowledge and experience of the candidate.

This posting will close on November 2, 2026 at 11:59 pm.

Interviews will occur on a rolling basis until the role is filled.

Exact compensation may vary based on skills, knowledge and experience.

This posting is for a current active vacancy. We are actively recruiting to fill this position.

After reviewing the qualifications listed above, we want you to know that we understand you may not meet all the qualifications described, but still encourage you to apply, as you may have other relevant expertise and experience that you can bring to the role.

At Infrastructure Ontario, we strive to create a culture that encourages a diverse equitable and inclusive environment that fosters belonging. We believe that experience comes in many forms and through learning from each others' differences and perspectives gives us strength.
