## **Talent Acquisition**

Transportation

HDR, Toronto, ON

## **Re: Transportation Planner (Toronto)**

Dear Hiring Manager,

I would like to apply for the Transportation Planner position in Toronto. I am an Assistant Planner in Transportation Planning with the City of Toronto, and before that I was a Transportation Planner at Metrolinx, where I worked on GO rail service simulation. I hold a master's degree in Transportation Engineering.

At the City I review the transportation studies filed with development applications and analyze travel data, including several years of the Transportation Tomorrow Survey, then write up what I find for planners and engineers in other divisions. I have run traffic simulations in Synchro, and I work in ArcGIS Pro, QGIS and Python. At Metrolinx I set up a command line workflow that pre-simulated slow orders in batches, cutting turnaround on scenario requests from days to hours, and built the Crew Variance Tool, a Python application that read large JSON operations files and summarised speed profiles and run-time variance across subdivisions.

I should be straightforward about the gaps. My consulting experience is limited to a short period at Mott MacDonald in early 2023, where I did traffic simulation of Ontario Line construction staging. I have not worked on Municipal Class Environmental Assessments or Transit Project Assessment Process studies, and I have not used EMME, VISUM or Aimsun. I have no experience writing proposals or attending public meetings for a consultant's client. I am not registered with PEO, so I am not an EIT or a P.Eng. today.

Thank you for considering my application.

Sincerely,

*Abdullah Al Zahid*
