Talent Acquisition

Transportation Planning & Traffic Engineering
Stantec Consulting Ltd., Markham, ON

Re: Transportation Planner (Markham / Toronto)

Dear Hiring Manager,

I would like to apply for the Transportation Planner position in Markham or Toronto. My work so far has been on the public side of transportation planning, and consulting is where I would like to take it.

The posting describes multimodal transportation analysis, safety assessments and traffic and transportation planning projects for public and private clients across Ontario. At the City of Toronto I review development applications and the transportation studies filed with them against City standards, so I know what a municipal reviewer looks for and where submissions tend to fall short. At Mott MacDonald I ran traffic simulations in Synchro to estimate how Ontario Line construction staging would affect the surrounding streets, and at Metrolinx I ran OpenTrack simulations of GO rail services.

Of the software the posting names, I have worked with Synchro, VISSIM and ArcGIS, as well as MATSim and OpenTrack. At Metrolinx I set up a command line workflow that pre-simulated slow orders in batches, cutting turnaround on scenario requests from days to hours, and built the Crew Variance Tool, a Python application that read large JSON operations files and summarised speed profiles and run-time variance across subdivisions. I write the technical reports, memos and presentations that carry findings to decision-makers.

I should be straightforward about the gaps. The posting asks for five or more years of relevant technical experience, and I have closer to four. I have not used Aimsun or SimTraffic, I have not managed consulting projects or budgets, and I do not hold a P.Eng., PTOE, RPP or RSP designation, which the posting lists as beneficial. I would be glad to be considered on the strength of the work above and my master's degree in transportation engineering.

Thank you for considering my application.

Sincerely,

Abdullah Al Zahid
